Crypto Sentiment Survey (April 2018)

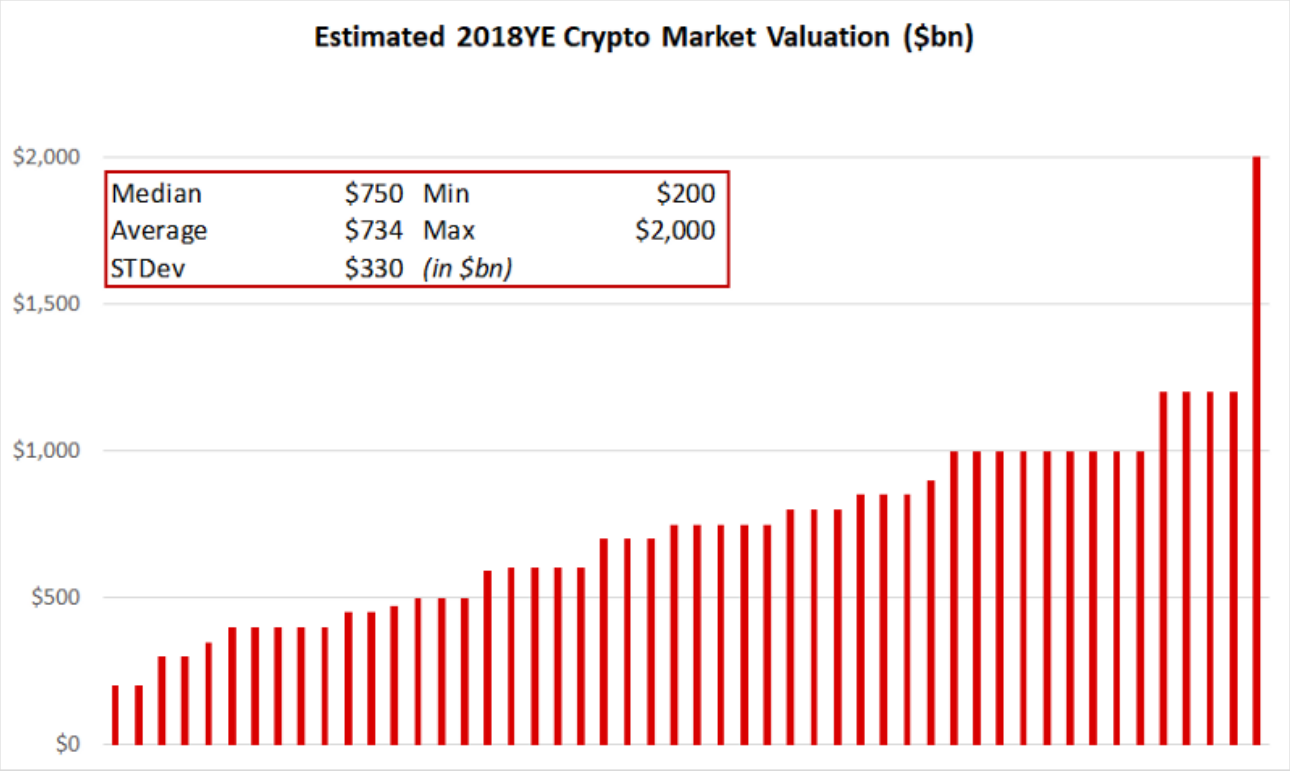
APRIL 17, 2018 ZACH DEWITT

I surveyed 51 people who live and breathe crypto. The goal of the survey was to better understand the near-term market sentiment from people on the front lines. Everyone who participated in the survey is professionally involved in the crypto ecosystem with the following breakdown: 33% are crypto VCs, 29% are crypto hedge fund managers / traders, 20% are crypto entrepreneurs and 18% are crypto researchers / enthusiasts.

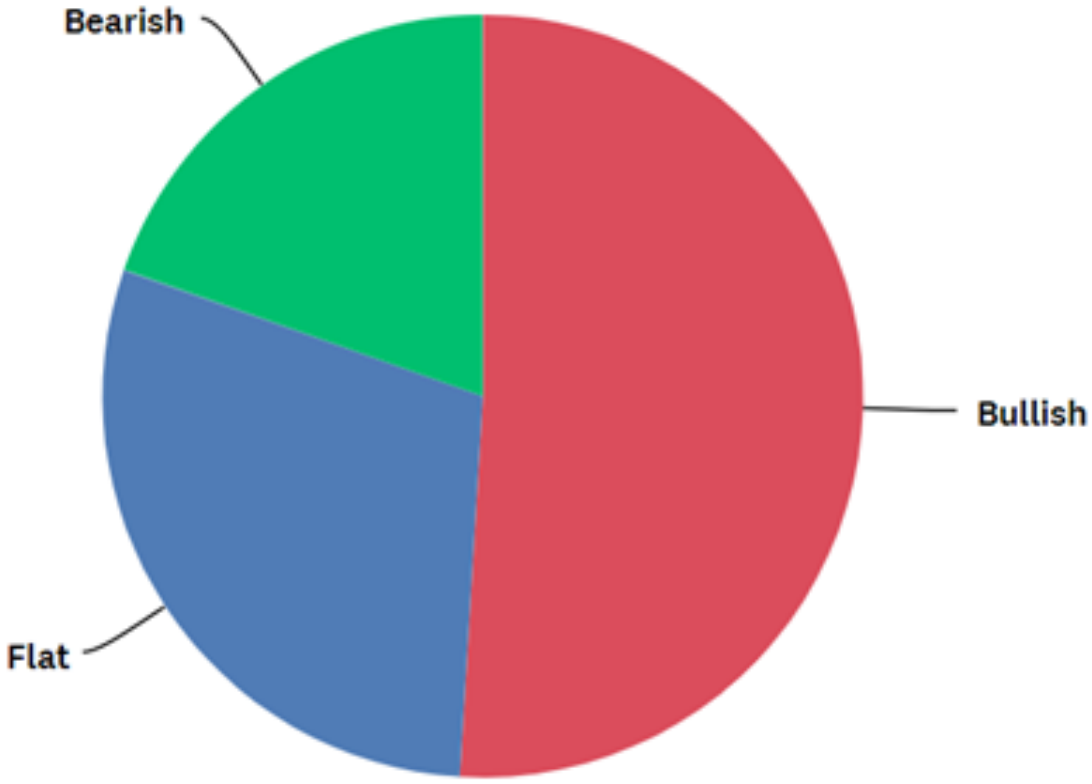
For questions, my contact email is zach@wing.vc

Here are the results:

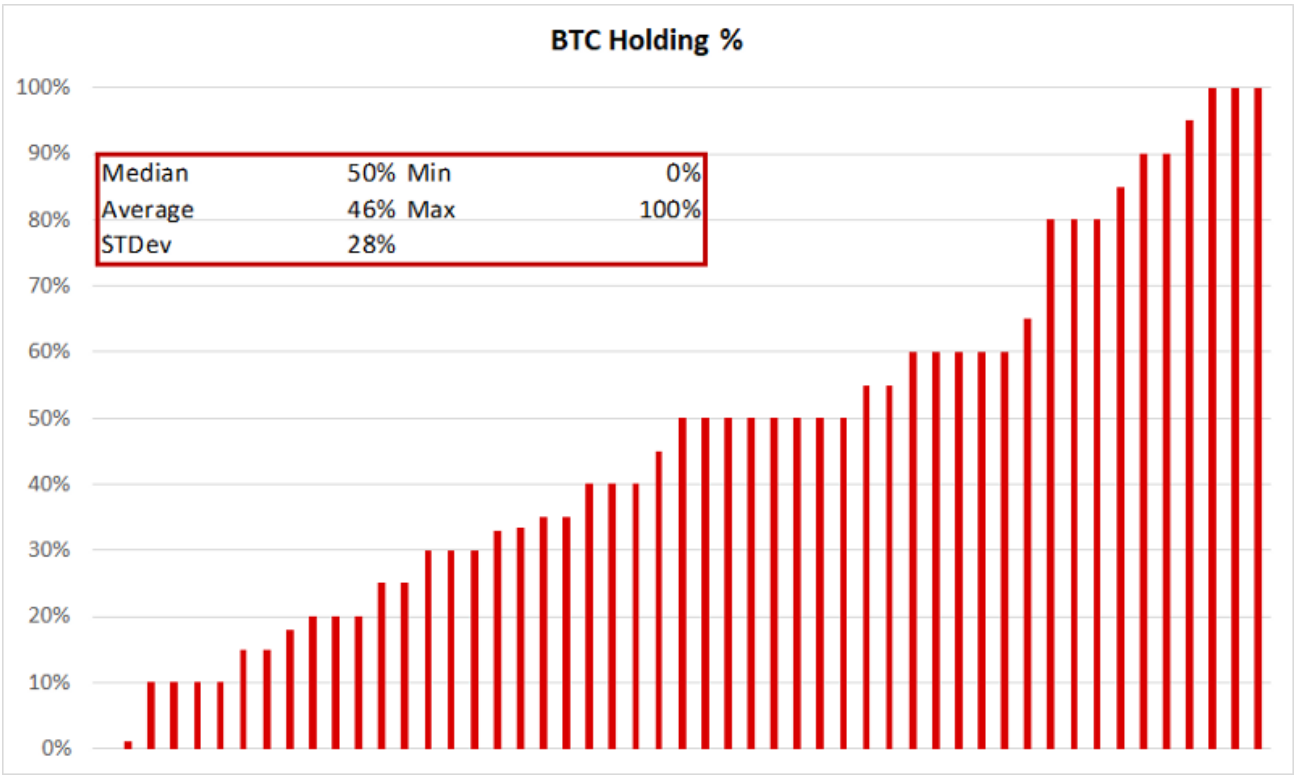
Q1: The crypto market is valued at ~$300bn today. What is your prediction for where it ends 2018?



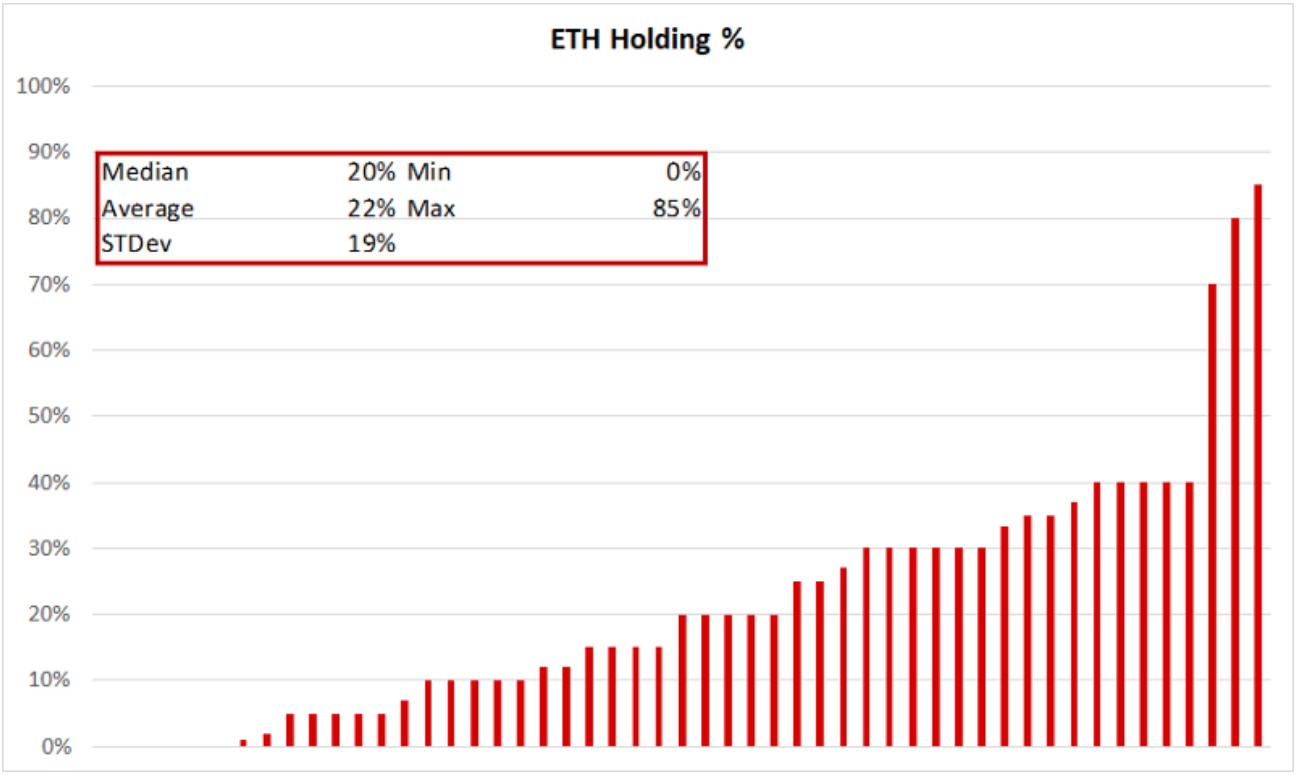
Q2: *Near-term sentiment*: for Q2 2018, how are you feeling about the crypto markets?



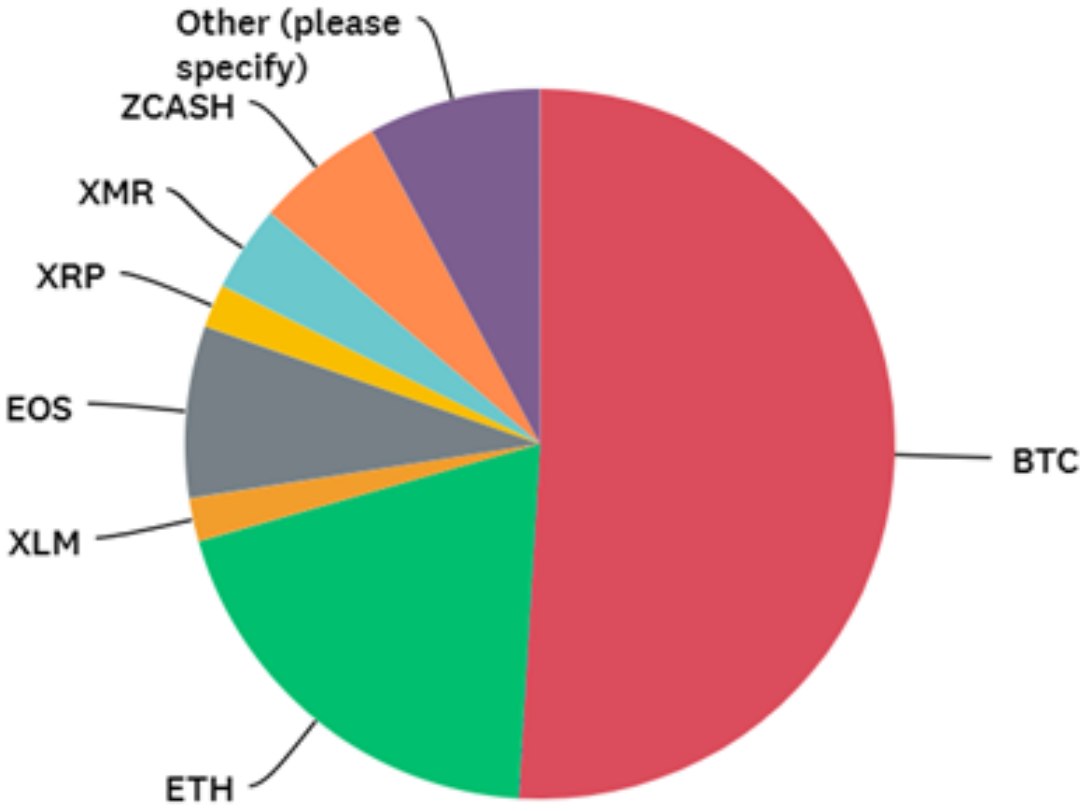
Q3: What % of your crypto holdings is Bitcoin?



Q4: What % of your crypto holdings is Ethereum?



Q5: What cryptoasset are you most bullish on for 2018?



Note: “Other” includes NEO, ATOM and WAX

Q6: Which alt coin (non-BTC, BCH, ETH) are you most bullish on for 2018?

Font size represents response frequency
