

The Genomics Intelligence Revolution

JANUARY 23, 2017 GAURAV GARG ESSAYS

At Wing, we are hugely excited about the potential of advances in genomics and data science to produce innovative startups. [Clear Labs](https://www.clearlabs.com/) (<https://www.clearlabs.com/>), one of our recent investments, is a great example of how next-generation sequencing and data analytics can be combined to create actionable intelligence for food brands. In a recent article in TechCrunch, which can be accessed by clicking [here](https://techcrunch.com/2017/01/21/the-genomics-intelligence-revolution/) (<https://techcrunch.com/2017/01/21/the-genomics-intelligence-revolution/>), Mahni Ghorashi, one of Clear Labs' cofounders, and I examine the key developments in the Genomics Intelligence Revolution that are driving change in this fascinating and critically important domain.
